Users: MA OA AS

1. Dashboard Frontend

Paths below are relative to `/api/admin/`. Keep existing authentication, permissions, request bodies, IDs, and response envelopes.

Method	Current path	New path
GET / POST	quizzes	assessments
GET / PUT / PATCH	quizzes/{id}	assessments/{id}
POST	quizzes/{id}/questions	assessments/{id}/question
DELETE	quizzes/{id}/questions/{questionId}	assessments/{id}/question
PATCH	quiz-questions/{id}/move	assessment-questions/{id}
GET	quiz-attempts	assessment-attempts
GET	quiz-attempts/{id}	assessment-attempts/{id}

1. Update the API client URLs for listing, creating, editing, question attachment/removal/reordering, and attempt review.
2. Read the assessment `type`. Creating a lesson quiz may send `type: "lesson_quiz"`, or omit it to use the server default. On update, omission preserves the stored value.
3. Keep the lesson quiz form. Do not enable other type choices in Phase 1.
4. For attempt filtering, use `assessment_id`; `quiz_id` remains supported.

2. Flutter App

Paths below are relative to `/api/user/`. Keep the existing lesson quiz UI, answer payloads, timer behavior, and result handling.

Method	Current path	New path
GET	content/{id}/quiz	content/{id}/assessment
POST	quizzes/{id}/attempts	assessments/{id}/attempts
GET	quizzes/{id}/my-attempts	assessments/{id}/my-attemp
GET	quiz-attempts/{id}	assessment-attempts/{id}
PUT	quiz-attempts/{id}/answers	assessment-attempts/{id}/ar
POST	quiz-attempts/{id}/submit	assessment-attempts/{id}/su
POST	quiz-attempts/{id}/questions/{questionId}/start	assessment-attempts/{id}/qu

1. Update the API service URLs, including saved answers, resume, history, submission, and question timer start.
2. Read `type` in the assessment model. If absent in an older response/cache, default to `lesson_quiz`. Handle an unknown explicit value safely; do not treat it as a supported lesson quiz.
3. Preserve existing assessment/attempt IDs, saved progress, and open attempts. Do not clear student data or create a replacement attempt during migration.
4. Keep existing notification navigation working; legacy IDs remain available.

Shared Contract

Field	Required handling
type	Default: lesson_quiz. Enum values: lesson_quiz, midterm, final_ lesson_quiz is enabled in Phase 1.
assessment_id	Attempt response alias for quiz_id. Prefer assessment_id, with fallback.
assessment_question_id	Question attachment response alias for quiz_question_id. Both attachment ID.

data / existing fields	Response envelope and existing fields remain available. Accep failing deserialization.
